Desert Origin Asayel Arabian Database User Guide

Welcome to the User Guide for one of the most exciting opportunities for preserving the Asayel Arabian horses, dwindling in numbers globally.

Follow the steps in the guide in order to learn how to access and utilize the Database. There are photographs and explanations we have included to make the experience seamless.

We are working towards Phase II with our Database development. As one would expect, all of these Advanced Search Options and design elements are expensive. In the meantime, we will give some helpful hints while we continue raising the money to provide even more from this platform.

A Few Notable Points

- The Desert Origin Asayel Database has the capability of hosting video and photo galleries on any horse entered. The pedigree shows duplications of paternal and maternal lines, as well strains.
- The platform is still reaching its full potential. As soon as enough money has been raised, there will be improvements to Advanced Search Options, design and general user friendliness.
- At this time, if you find yourself without an option to get back to a page you were on, use your Device's page back directive. You may have to re-enter the horse's name to pull up the pedigree to proceed.
- This Database has been designed to catalogue Asayel Arabians ONLY. All horses entered in this Database found not to meet the criteria for being Asil will be marked NON-ASIL on their pedigree until they are deleted. The NON-ASIL demarcation will also populate on progeny.
- Only Database Administrators have access to deleting horses, photos, and video. If you need something deleted, on the Pedigree Page, there is a button for REPORT ERROR AND UPDATES. Follow the prompts to report the error or what you need deleted and an Administrator will address your concerns. This said, PLEASE be diligent to avoid multiple duplications of the same horse. This is easily avoidable, and we deeply appreciate your time and attention.

Welcome

The Desert Origin Asayel Arabians Database was established to help identify all the Asil Arabian horses throughout the World. We hope this database will help further the goal of the preservation of our pureblood Asil Arabian horse. This database is solely for the Asil, pureblood Arabian and in the database, you will be able to list all your Asil bloodstock. Please note listings of non-Asil Arabians will be deleted.

Horse Database

Here you can browse or search the database for Asil Arabians throughout the World. You will find the complete pedigree, photos, and/or video when available, location country, breeder, owner, and offspring all in one place.

As the database grows we will be adding an advanced search so that you can find different categories, i.e. Straight Egyptian, Desert Bred, Babson, Davenport, etc., and/or search for specific sire lines and dam lines, as well as search for Asil Arabians by country location.

Test Mating

You can perform hypothetical breeding combinations online. Choose between all the world's active sires and dams and view and analyze your future foal with this "virtual pedigree" tool.

How to Add a New Asil Arabian to the Database

This will look familiar from searching for a horse already in the database. To ADD a horse, the horse MUST BE ASIL. All entries are validated and will be marked NON-ASIL if they are found not to meet the criteria of being considered Asil, until they are deleted. Enter the name of the Asil Arabian you wish to add to the Database. Click Go. For the Purposes of illustrating adding a horse, we will use HADAYA PRINCE AZIZ.
